SquadUp User Manual

Hackstreet Boys

Introduction

- SquadUp is an app for keeping track of your record in pickup basketball games at your local courts
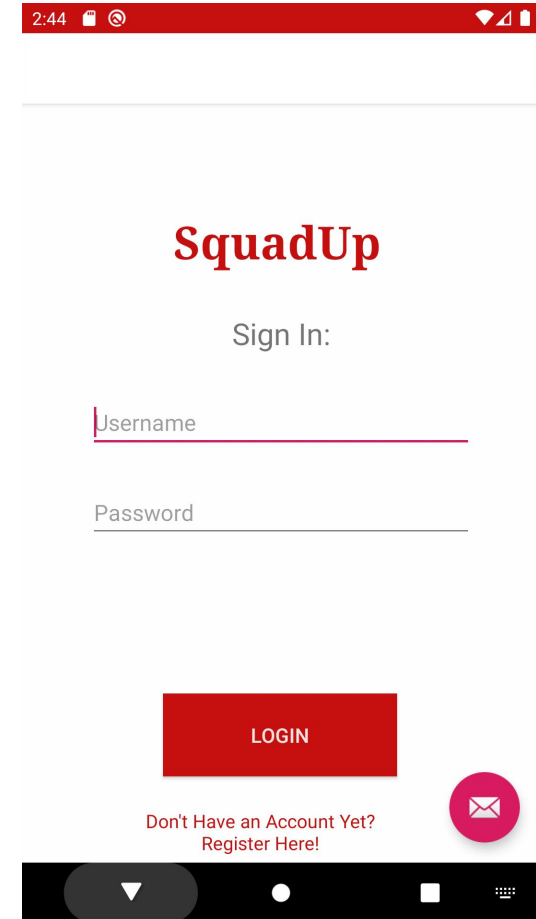

Features

- User accounts
- Teams for users to join
- Individual record keeping
- Running games

Why use SquadUp?

- Brings your friends together on a team
- Helps you keep track of your win loss record on the hardwood
- Encourages teams to stay together to increase their record
- Could evolve into a major player in basketball

Login Page

- Here is the first screen you'll see when opening the app. If you're an existing user, you can enter your name and password to login, or register if you're a new user.

Registering

- To register, simply fill out the forms and press the register button.

Profile Page

- After registering and logging in, you'll be taken to this page. Here, your wins and losses will be displayed, along with several buttons.

Welcome, zackTest!

GO

Starting a game

- Selecting the "Start Game" button on the profile page will take you here. Here you can select two teams to play against each other. Pressing the button will begin the game.
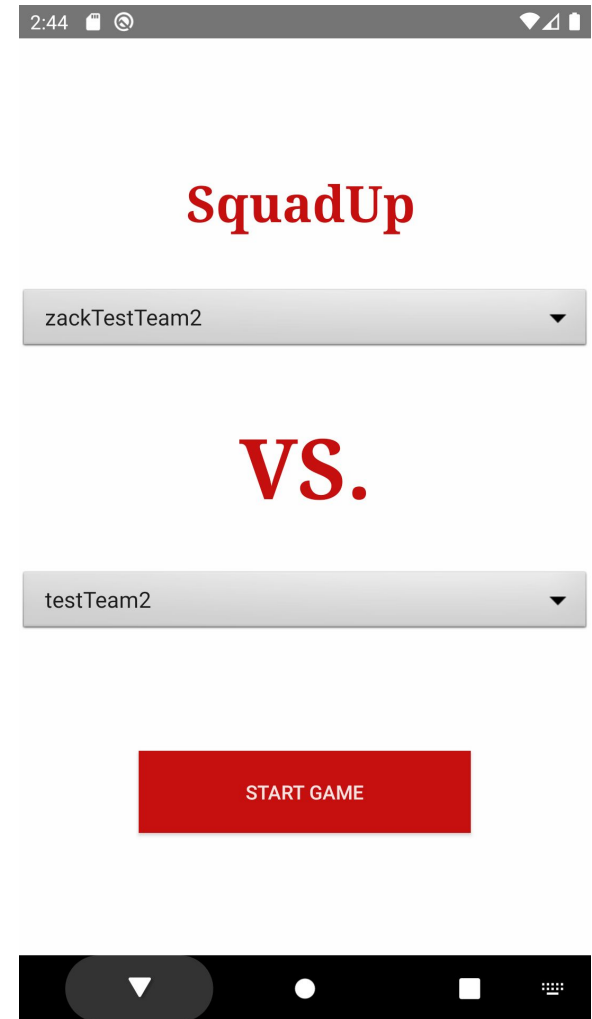

Game Screen

- On this screen you can select the winner of your game. After selecting the winner, both teams wins and losses will be updated on the profile page.

Errors you may encounter

- Using the back button on your phone may sometimes cause bugs
- Using the back button after starting a game can cause database errors

Potential future features

- Tournament brackets
- Queuing for courts
- Court leaderboards
- Finding courts via Google Maps API

FAQ

- Can I remove myself from a team?
  - As of now that is not currently available
- What if I forget my team code?
  - Write it down and don't forget it
